- from the 2011 Armpriester interview with Huggins:

Q: Do the female ETs' vaginas feel any different from human female vaginas?

A: I can't say there was all that much warmth. You got to remember, your senses are subdued when you're with them. The intense orgasm you would normally feel is toned down.

Q: Are you sedated?

A: Yeah, you're sedated to keep from flipping out.
